Attachments: Chlorobenzenesulfonic Acid, p- Internal Review Draft 3_Lambert rev copy_6'10'16.docx

Hi Teresa,

Thanks to the STSC for getting this knocked out so quickly. I have addressed all of the comments except for one; could you please submit a literature search update for this PTV. Also, I am not sure what the best path forward is for the comment re: the CalEPA cites in Table 2. I have provided some greater perspective in my response but that does not fix the issue. I would like STSC's advice on how best to cite this report if it is not yet in the CalEPA database(s). Thanks

Jason,

Looks like there are a few comments for you to address from STSC. Once these are done, I can move this on through IR. Thanks.

Teresa

Teresa,

The IRD for p-CBSA has been processed and is attached. **There are five comments left for the author to review**, three in Table 2 on page 4, one regarding a literature search update on page 5, and one regarding the use of 70 vs. 80kg to calculate a DAF on page 19. Please let us know if there are any questions and we will get you a hardcopy.

Thanks,
Jacki

Contractor draft of the chemical I just sent from Jason. We got a little backwards in process on this one. Thanks.

Teresa and Jason,

The draft PTV document for p-CBSA is attached. The two versions include one with HERO links for Agency use and one with HERO links for use by the public. Also attached is a zip file containing the BMD input and output files. The extension has been changed to piz to get through EPA email. You can access the files by first changing the extension back to zip. References should be available to you through HERO.

Please let me know if you have any questions. We look forward to receiving your review comments.

Marc
